

For this year's competition, the RoboJacket IGVC team redesigned and developed a completely new robot. I certify that the team made significant changes and improvements from the previous year's design. The amount of work that the team has spent on the development is substantially greater than what is required in a senior design course in the School of Mechanical Engineering.

Jun Ueda, Assistant Professor, Mechanical Engineering, Georgia Institute of Technology

A handwritten signature in cursive script, appearing to read "Jun Ueda", followed by a horizontal line.
