

PP30 Powerpole® Connector

Powerpole® connectors provide cost-effective reliability, design flexibility and safety for your products' manufacture, installation and maintenance.

The housings are modular and genderless. Powerpole® connectors provide 600 Volts continuous, AC or DC operation. Wire sizes range from #12 to #16 AWG (3.3 to 1.3 mm²). Contacts are available in reeled and loose piece designs to support all production needs from engineering prototype, low volume and high volumes products.

FEATURES

Flat wiping contact system

Minimal contact resistance at high current, wiping action cleans contact surface during connection/disconnection

Colored modular housings

Provides visual identification of proper mating connector

Molded-in dovetails

Secures individual connectors into "keyed" assemblies which prevents misconnection with similar configurations
